CONSUMER: Shopping...Online vs. the Mall

Whether you shop online or at the mall depends on your personality, your needs, and what you want to buy. Consider:

Online shopping safety

It's convenient to shop online, but hackers could steal credit card numbers and personal information. Make sure a shopping site is secure:

- Look for a padlock or key on the frame of the browser screen.
- Check the web address on the top of your browser to see if it reads https://. Unsecured sites are designated http://.

Mall hassles

Most teenagers like hanging out at the mall. Real mall shopping has pitfalls, too.

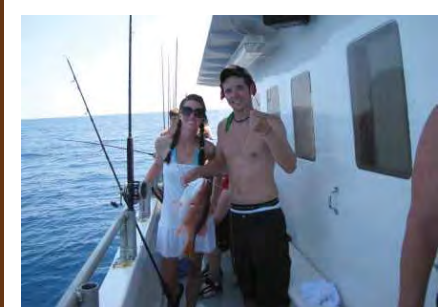

You might:

- Need a ride to get to the mall
- End up parking what seems like a mile away
- Encounter crowds, lengthy check-out lines, and rude sales people

You can do both. Wherever you shop, be smart to get the most for your money.

Blog Spot: Overdrafting Fees (Money Smarts)

According to Kiplinger's Personal Finance Magazine, more than 1,800 banks and credit unions are changing the way they handle overdrafts in response to the Federal Reserve's announcement of its mandatory opt-in policy.

This means that some credit unions will decline a debit-card transaction if there is not enough cash in the account. Some won't even charge a fee if the account is overdrawn by only \$5 to \$10. If this is a problem for you,

be sure to look into overdraft protection.

Check if your credit union will send you a low balance alert. Balance alerts allow you to choose a dollar amount below which the alert is triggered. When your balance falls below that level or is inadequate to cover a bill that is almost due, you get an e-mail or text alert.
